

March 11, 2006

Dear Leone,

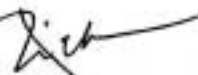

Thank you so much for lending me the pre-release copy of your book! I finished it this week. The inscription at the front added to the privilege of reading. David's story is one I have only heard bits and pieces of since I arrived, so it was a blessing for me to hear the whole story. God truly is at work and your efforts have proven many of the experts wrong in dealing with head injuries and that rather ambiguous "persistent vegetative state" designation. I wonder how many lives will be saved by those who have more hope from the start of a tragedy and invest in the constant therapy.

I have tried repeatedly in recent days, while ministering to those with loved ones who are dying, to encourage them to sit close, be there, and gather around as a family. The last days and hours can be tough. But where a family does what your family has done, and they love through the hardest times, then sickness, injury and even death become holy moments and moments of transformation. That is why God put us in families. But too often we back away or refuse to do what the Nunleys have done for David and miss his will, his appointments and his blessings.

Thank you for this testimony. I pray that David will continue to witness through this book and that the influence will save lives, change medical standards, and give glory to Christ.

We continue pray regularly as a staff and elder council for David, Andre, and your family. While reading, I was able to also pray for all those folks that you referenced and thanked by name. We look forward to many more blessings as we continue to see God at work in ways that only he can.

Blessings!!!

  
Pastor Rick
